FULL STACK WEB DEVELOPER

Experience using front end and back end technologies such as Ruby on Rails, ExpressJS, JavaScript, and ReactJS. I bring 6 years of working as a Calibration Technician with strong skills in customer service, meeting deadlines, and building relationships. Two of those years being the website lead which let me explore my vision for design, as well as, application/database management. I have a love for learning and constantly challenge myself to master something new. As a developer, I'm excited to be in a collaborative environment and use my creativity and problem-solving skills to help a company create quality products.

TECHNICAL SKILLS

Microsoft Office, HTML, CSS, JavaScript, ReactJS, NextJS, Sass, Tailwind CSS, Bootstrap, Framer Motion, Responsive Design, MySQL, PostgreSQL, Ruby on Rails, Git, NodeJS, ExpressJS, Sequelize, RESTful APIs, Object-Oriented Programming, JSON, jQuery, Google, Agile Development, Stack Overflow, Figma

TECHNICAL PROJECTS

QuizChamp - [Live Demo](#) | [Front End Github](#) | [Back End Github](#)

A quiz application that persists user data and scores. Application utilizes a leader board and crown reward system.

- Implemented with a ReactJS front end and a Express/NodeJS back end.
- Deployed MySQL database
- Ongoing live service application with new quizzes being added regularly.

EntSpot - [Live Demo](#) | [Github](#)

An IMDB clone using the TMDB expansive API. Search and find information and link to all forms of entertainment!

- Created with NextJS & Tailwind CSS responsive design.
- Features a light and dark mode.
- Operates smoothly with a clean and simple UI.
- Tailors experience for users on any screen type.
